

Bangkok Aviation Fuel Services Company Limited (Public Company)

Climate Change Policy

Bangkok Aviation Fuel Services Limited (Public Company) and its subsidiaries recognize the importance of addressing climate change issues in line with the Paris Agreement, aiming to limit global temperature not exceed than 2 degrees Celsius and striving to keep the temperature below 1.5 degrees Celsius. In response to this agreement, the company has established policies regarding climate change, setting targets to achieve net zero emissions by the year 2050 and developing plans to reduce emission within the groups by following guidelines:

1. BAFS Group tackles climate change concerns from its business operations and effectively oversees resources in accordance with the net-zero strategy.
2. BAFS Group establishes the emission reduction targets and monitor progress continuously.
3. Annually assess policies, goals and action plans to ensure they remain relevant and aligned with the current global situation.
4. Evaluate both the risk and opportunities associated with climate change.
5. Create transparent and verifiable practices for accounting greenhouse gas emissions and develop reduction strategies based on the organization's business operations.
6. Transparently disclose climate change information through appropriate channels.
7. Consistently promote awareness and knowledge on climate change to employees.
8. Encourage the adoption of renewable energy within the organization in order to support the emission reduction plans of the groups.
9. BAFS Group consider compliance with the climate change policy as a shared responsibility among all levels of management and employees. Collaboration is expected in implementing measure to achieve our net-zero goals.
